

A very simple and quik way to add your own fonts your skins. I use Photoshop 7.

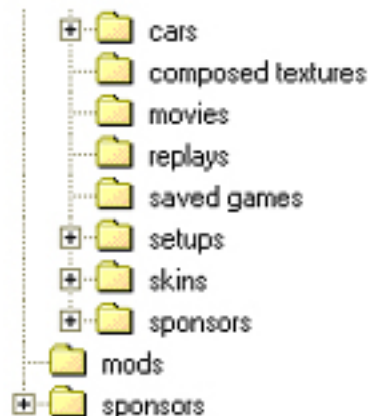

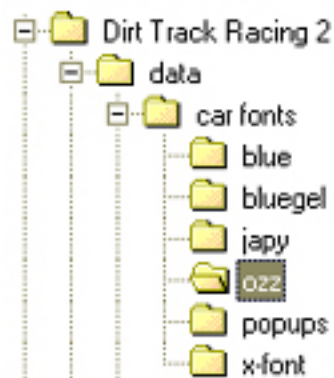

1. Open a new document 256 by 256 with a transparent background.
2. Open a font file from the game. I'll use mopar blue.
3. All you need it for is a guide to put your numbers. I'll use the **ECELERATE** font. Enter your numbers and align over the mopar font.
4. Remove the mopar layer. Style the font the way you want to see it.
5. I'm just going to add a rust style from the photoshop library. Apply other styles/fonts.

**Get the picture.
Now to save your
creations.**

**Create a folder in
C:/...../...../Dirt Track Racing 2/data/car fonts/your folder/
font.tga. Remember to save it at 32bits/pixel. Edit the str
file in the skins folder you want the font to show up in.**

**Eg: car = stockmontecarlo
specular = 0.250000
number font = ozz**

**Hope this is clear
enough.
--Ozzy**
